- One of the most unique and interesting bulls to surface in recent years BLUEPRINT displays exceptional phenotype with an EBV set to match
- With growth predictors in the top 1% of the breed for 200, 400 and 600 days and a carcass weight EBV in the top 1% BLUEPRINT offers a unique pedigree mix with outstanding muscle and depth of body
- BLUEPRINT'S first calf crop is outstanding, he offers top percentile EMA, Retail Beef Yield and all indexes, along with a top 20% EPD for docility.
- Combine that with a top 3% heifer pregnancy EPD and top 10% average daily gain EPD and it shows Blueprint is a must use bull in 2020
- Use BLUEPRINT on larger framed, flatter made females that need more depth and muscle expression
- Watch Blueprint video here: https://youtu.be/cK38bTO_zN8
